SUMMARY

Full Stack Engineer specializing in the MERN ecosystem with a strong background in engineering design and problem-solving. Proficient in JavaScript (ES6+), React.js, Context API, Redux, HTML5, CSS Modules, Tailwind CSS, Node.js, Express.js, RESTful APIs, MongoDB, and SQL. Skilled in optimizing app performance and building clean CRUD functionalities. Eager to contribute to Inception's team by leveraging technical skills and innovative solutions.

EXPERIENCE

Freelance / Independent, Full Stack Developer (Self-initiated Projects)

Jan 2023 - Present

Developed and deployed Wanderlust, a full-stack Airbnb clone utilizing Node.js, Express.js, and MongoDB, enhancing user experience and performance. Created a React Task Manager SPA featuring Context API and drag-and-drop functionality, improving task management efficiency by 15%. Built multiple applications including a Hospital API and Placement Cell Web App, showcasing versatility in web development and strong proficiency in React.js and Node.js.

Orbis Elevator Co. Ltd., Design Engineer

Oct 2024 - Present

Designed and engineered precision elevator components using SOLID WORKS and CAD tools, ensuring compliance with ISO/ISO safety standards.

LOTUS ENGINEERING, Design Engineer

Aug 2023 - Sep 2024

Designed sheet metal parts for printing machines and industrial controllers using SolidWorks, reducing rework by identifying tolerance mismatches early in the design cycle. Created 2D and 3D CAD models and detailed fabrication drawings using SolidWorks and AutoCAD. Optimized sheet metal designs for manufacturability, reducing production time and material costs by 30 percent. Implemented design changes and continuous improvements based on feedback from assembly and field operations.

HVAX Technologies, Export Executive & Production supervisor

Jan 2020 - Apr 2023

Managed all aspects of export documentation to ensure compliance with international trade regulations. Coordinated timely shipment of goods to global markets, enhancing operational efficiency. Developed strong relationships with stakeholders to facilitate smooth trade operations.

HVAX Technologies, Design Engineer

Jan 2019 - Apr 2023

Designed and developed customized Air Handling Units (AHUs) and pharmaceutical equipment to meet client-specific HVAC and cleanroom requirements. Created detailed 2D fabrication drawings and 3D models of AHUs, sheet metal enclosures, and pharmaceutical machinery using AutoCAD and SolidWorks. Coordinated closely with the production team to ensure smooth manufacturing, assembly, and timely delivery of projects. Assisted in preparing export documentation, product certifications, and technical datasheets to meet global compliance requirements. Coordinated export packaging of AHUs and pharmaceutical machines to ensure safe international shipping, following ISPM15 and client-specific packaging standards. Supported the logistics team in arranging shipments, creating packing lists, and assisting with customs clearance documentation. Handled third-party inspections (TPI) for export orders, ensuring product compliance with international quality standards before dispatch.

EDUCATION

Coding Ninjas

MERN Stack • Information Technology

University of Mumbai

Bachelor of Engineering - BE • Mechanical Engineering

University of Mumbai

High School Diploma

University of Mumbai

High School Diploma

SKILLS

JavaScript Libraries • React.js • Node.js
